

Company Profile

BRIDGING EAST AND WEST ON THE SAME SECURITY PLATFORM

MVP Tech, established in 2003, is a specialized security and technology systems integrator representing leading products from various U.S, European, South African and Australian product manufacturers. Some of these products include, high-end IP Camera systems, Automatic Number Plate Recognition, Video Analytics, Radar Systems and real-time IP based access control solutions.

MVP Tech prides itself in selecting unique technologies with few or no alternatives in the market combining best of breed products with the most cost effective designs. Our engineering capabilities including all aspects of design, integration, installation, and maintenance and has allowed us to expand into the area of turn-key technology integration products providing a single point of contact to our clients

CONTINUED COMMITMENT

Our mission is reflected through a continued commitment to execute diverse and highly complex projects on time, whilst delivering top products within budget, and offering unparalleled manpower expertise for mission critical assignments.

In an ever increasing competitive world we strive to stand apart by taking on challenges that most companies shy away from. Our corporate philosophy is customized quality not easily available quantity.

A Division of MVP Group

SERVICES & PRODUCTS

We design and deploy turnkey technology infrastructure projects for clients in various fields. Our solutions meet the following requirements:

Security Systems

- IP Surveillance Cameras
- Long Range Thermal Cameras & Intrusion Radar Systems
- Video Analytics (Non-motion detection & motion detection)
- Car Park Management Systems, Gate Barriers & Signage, Traffic Lights & Controllers
- Automatic Number Plate Recognition (ANPR)
- Under Vehicle Scanners
- Intelligence Gathering Systems
- Access control, Telephone Entry System & Time-Attendance
- IP Audio/Video Intercom Systems
- Explosives Detection/Prevention Systems
- Xray Scanners, Metal Detectors, Inspection Kits, Perimeter & Buried Intrusion Detection
- Hotel Access Control

IT & Structured Cabling

- Multi-Suite Networking
- Wireless Internet Solutions
- Structured Cabling & Fiber Optics
- Customized Software Solutions
- Hotel Management Systems
- Automated Internet Billing Systems
- Wireless Long Range Solutions
- Storage Systems

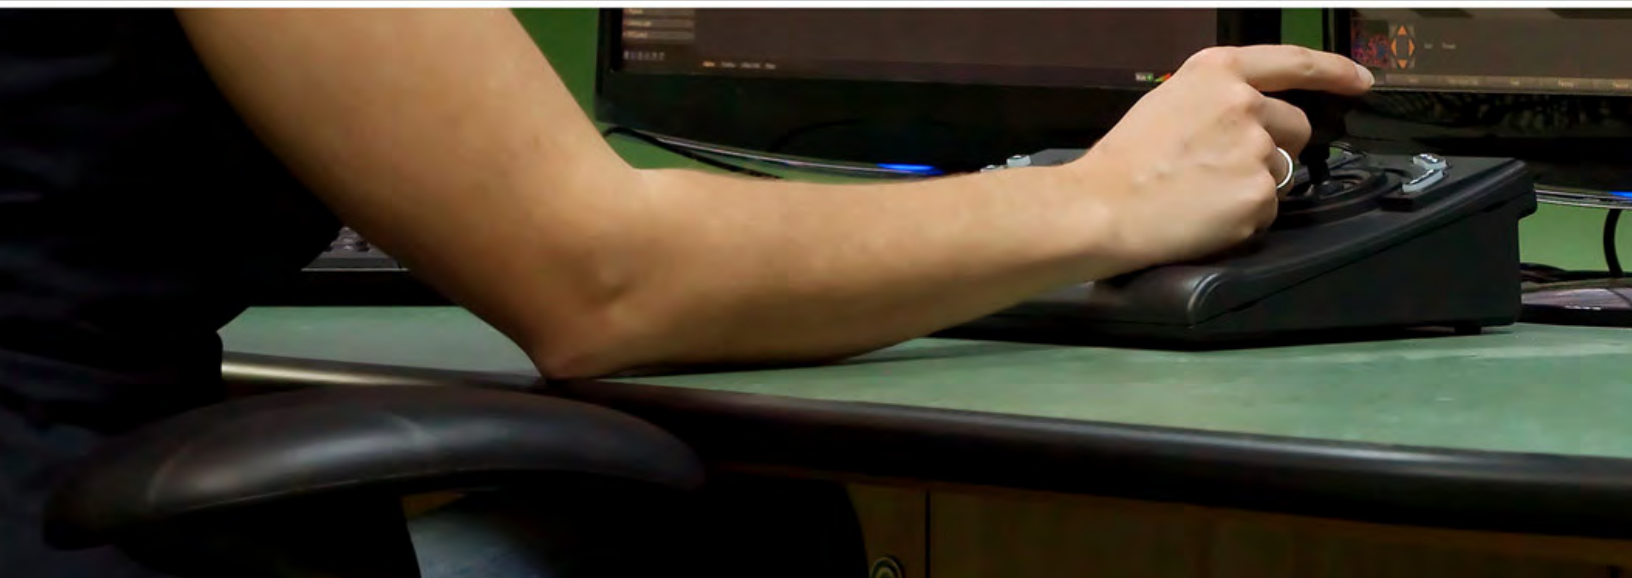

Audio Visual & Building Automation

- Rear-projection customized screens any size up to 140" (black and mirrored)
- Outdoor & Indoor Advertising Screens (any shape and design)
- Sound Systems
- Indoor/Outdoor Variable Message Sign Boards
- Room Management Systems
- IP TV
- SMATV

MVP Tech is fully licensed to operate within the security fields in its present markets, and has executed multiple projects globally to the same stringent high level standards.

We combine our international team's engineering experience with local legal requirements and client's operational needs, to design best of breed solutions.

"We love everything IP"

The core majority of our products have been IP (Internet Protocol) based and will continue to be so in the future. In fact, MVP Tech was installing IP based camera solutions as far back as 2003 when analog systems ruled the security world.

We strongly believe in the products we select as being the best of their breed. They are well built, with recognizable industry brand names and, more importantly, have proven very well performance wise once deployed in the field.

CAPABILITIES

We have taken a different approach to other companies focusing on our engineering, operations and customer support aspects. Unlike other companies that employ a bulk of sales personnel and always fall short on the follow through with engineering and customer support we invest most our resources in acquiring the best engineers and always keeping them up to date with the latest developments in this fast pace industry.

Our global engineering team consists of more than 130 individuals including:

- Sites Project Managers
- Jr. Project Managers
- Project Engineers (Electrical, Electronics, Networking & Software)
- Pre-Sales Engineers
- Fiber Specialists
- Auto Cad Engineers
- Technicians (Electrical & Civil)
- Engineering Support

KEY INDUSTRIES

MVP Tech currently serves several business areas in demand for sophisticated systems regionally. Some of these areas include servicing capabilities for the following:

- Oil & Gas
- Hospitality
- Government Agencies
- Police, Military & Enforcement Agencies
- Residential & Business Towers
- Logistics Companies
- Retail Groups

- Designing and deploying next generation infrastructures -

REFERENCES

Over the years our organization has proudly served over 250 major clients regionally and internationally within the government and private sectors extending our reach across the GCC, Middle East, North Africa and Brazil.

Along with our IP based expertise and our diverse engineering background, we have been brought into many projects to provide total solutions. From structured cabling, networking, communication systems, telephony, home automation and much more, let us show you what we have done and what can be designed especially for you.
